SeeMD-Telepharmacy:
Virtual Care at your Fingertips

SeeMD-Telepharmacy delivers a flexible telehealth platform enabling you to meet with exactly who you need to address a patient's needs – all in one easy-to-use platform. The solution facilitates seamless web-based video teleconferencing between two-to-four parties and provides an online system for scheduling, medication reconciliation and management. Through this system, pharmacists can increase patient access to pharmacy services, support ongoing chronic disease management programs, and expand the patient's care circle with additional participants to the telepharmacy visit.

Web-based video teleconferencing	Medication Therapy Management (MTM) workflow	Chronic Care Management (CCM) support	Built in appointment scheduler	Medication Action Plan

| Secure Messaging	FHIR compliant	Patient portal	Patient education materials

SeeMD-Telepharmacy Enhances Communication Across the Continuum of Care

Expand the Care Circle as Needed: Easily include participants from more than one location – invite members of the care team or family members with a simple click.

Primary & Specialty Care: Giving physicians the platform to deliver the highest level of care to their patients wherever they are – simply, safely, and securely.

Discharge & Case Management: Enabling clinicians to monitor transitions of care and ongoing chronic care management.

Medication Therapy Management Programs: Pharmacists can easily connect with patients and their onsite caregivers for MTM outreach – and easily follow-up with the PCP if needed.

Whole-Person Care: Quickly connect the right team for all of your patient's needs – from behavioral healthcare & specialty physicians to social workers & community service providers.

Hexagons: SPECIALIST, PATIENT, PCP, PHARMACIST, CAREGIVER, CARE MANAGER

About SNC Telehealth Solutions

As a leading provider of innovative virtual care solutions, SNC Telehealth Solutions is dedicated to expanding equitable access to healthcare through technology, communication, and services. SNC Telehealth Solutions brings together the expertise, knowledge and practical experience of two results-proven organizations, Safety Net Connect and Zane Networks.

SeeMD-Telepharmacy in Action

SNC Telehealth developed the branded See-UR-Pharmacist application for Howard University's School of Pharmacy to provide a telepharmacy solution to support the expansion of remote pharmacy services to medically underserved communities in Washington, DC.
